FORENSIGHT DIGITAL IMAGE FORENSICS REPORT

Analysis ID: **849f1863-516** • Generated: 2026-10-25T13:06:15.689377+00:00

IMAGE SPECIFICATIONS & INTEGRITY

Filename:	copymove.jpg	SHA-256 Hash:	f97b4cede01d2658705ca426b122...
Dimensions:	400 x 400 px	File Format:	JPEG
Color Mode:	RGB	Payload Size:	24.5 KB

OVERALL FORENSIC VERDICT

Verdict: POTENTIAL_MANIPULATION

Summary: Convergence of deterministic forensic evidence indicates potential image manipulation: Copy-Move duplication detected (11 geometrically consistent keypoint clusters). Resampling detected via periodic derivative spectral correlation (PAR 5.755). Sharp edge discontinuities detected along candidate boundaries.

Provenance Check (C2PA): CREDENTIALS_ABSENT

FORENSIC MODULE SUMMARY

Forensic Analysis Module	Execution Status	Findings & Verdict Contribution
Metadata & File Inspection	COMPLETED	NO_METADATA_PRESENT
Error Level Analysis (ELA)	COMPLETED	UNIFORM_COMPRESSION_ERROR
2D Fourier Frequency Analysis (FFT)	COMPLETED	PERIODIC_FREQUENCY_ANOMALIES_DETECTED
Resampling Spectral Correlation	COMPLETED	RESAMPLING_PERIODICITY_DETECTED
Copy-Move Duplication Analysis	COMPLETED	EVIDENCE_OF_COPY_MOVE_DUPLICATION
Noise Residual & Inconsistency Analysis	COMPLETED	HOMOGENEOUS_NOISE_DISTRIBUTION
Edge & Boundary Discontinuity Analysis	COMPLETED	ISOLATED_SHARP_BOUNDARY_DETECTED
JPEG Block & DCT Analysis	COMPLETED	CONSISTENT_SINGLE_COMPRESSION

LIMITATIONS & SCIENTIFIC INTEGRITY STATEMENT

Scientific Integrity Notice: ForenSight uses deterministic signal processing, mathematical feature matching, and physical noise statistics. Results do not represent legal certitude. Inconclusive findings or absence of detected anomalies must NEVER be interpreted as absolute proof that an image is unaltered or authentic. Furthermore, this tool is not an AI-generated media classifier; synthetic images may lack traditional editing seams.
