OVERALL FORENSIC VERDICT

Verdict: INCONCLUSIVE

Summary: Inconclusive: A solitary anomaly (High-pass noise analysis shows 1.67% patches with statistically divergent noise variance.) was observed, but lacks converging corroboration from independent tests.

Provenance Check (C2PA): CREDENTIALS_ABSENT

LIMITATIONS & SCIENTIFIC INTEGRITY STATEMENT

Scientific Integrity Notice: ForenSight uses deterministic signal processing, mathematical feature matching, and physical noise statistics. Results do not represent legal certitude. Inconclusive findings or absence of detected anomalies must NEVER be interpreted as absolute proof that an image is unaltered or authentic. Furthermore, this tool is not an AI-generated media classifier; synthetic images may lack traditional editing seams.
